# Lab # 8: SQL Practice

Objective:

- SQL Practice

Task:

Create 3 Tables (Students, Courses, Registrations).
Add primary key to each table, and connect Students and Courses to Registration using foreign keys.
Add at least 3 columns per table (not including ID column).
Add at least 3 rows per table.

Add/Modify at least 1 column per table after creation, OR add at least 1 constraint per table after creation (using ALTER).

Create 1 view, which will show a subset of your choice of the registered students names, and courses names.
